28th July 2021

Dear Sir, Madam

Re: Selective price increases on Texecom products

I am writing to inform you that from the 1st September 2021, Texecom will be implementing a price adjustment across a number of Texecom products in the UK.

Like so many businesses across the UK in these unprecedented times, Texecom is facing external pressures, such as spiralling raw material costs and rising logistics bills, and these are key factors in this decision. Until now, we have absorbed costs (where possible) to help support our customers both in the UK and abroad.

With this in mind, there are a number of product groups not effected by any price increase. These include the recently released Capture hardwired detector range, Smart Com communication devices, and the Veritas range of control panels (excluding Veritas Keypads).

For other Texecom products, an increase of 4.5% will be implemented. Details of the new price list can be requested from the Texecom internal sales team.

In the meantime, should you have any further questions please feel free to contact myself or a member of the UK sales team.

Thank you for your continued support.

Patrick Kyle
Head of Sales UK & Ireland
